

DeSoto Avenue, Boyer River Bridge

Start Date: TBD, Estimated November 2017
Road Closed: Complete closure, with Detour
Anticipated Completion: Spring/Summer 2018

Project Details: This bridge is posted with a weight restriction, but is not rated Structurally Deficient or Functionally Obsolete. Pottawattamie County appealed to the State for Federal Funding and was granted Federal Funding for Bridge Replacement.

The new structure will be built in place of the old structure and require complete closure during construction. The Construction will take 6-8 months depending on weather. With larger structures we start in the Winter to avoid high flows and reduce costs by accepting a longer construction period. It wouldn't be possible start and finish the bridge during the summer without impacting both planting and harvest.

The County applied for and was denied a Federal Grant to be awarded for projects providing access to National Parks.
